PROFESSIONAL SUMMARY

Computer Science graduate who plans before coding, works in feature branches, writes tests, ships to production, and explains every decision. Strong Python backend, REST API design, RAG pipeline and LLM API integration, vector databases (ChromaDB, FAISS), Docker and Docker Compose, GitHub Actions CI, JWT authentication, PostgreSQL, Redis, and structured logging. Builds things that work end to end and can walk through the code live.

EDUCATION

Medi-Caps University

Bachelor of Technology in Computer Science and Engineering CGPA: 7.5

Indore, India

Jul 2022 – Present

PROFESSIONAL EXPERIENCE

Software Engineer Intern

July 2026 – Present

Mactores (Remote)

- Designed APIs before writing code. Built REST API backends in Python (FastAPI) with JWT token-based authentication, PostgreSQL data modelling, Redis background job queues for async processing, and structured JSON logging with request IDs propagated through the system.
- Built RAG pipelines using LLM APIs (Claude, OpenAI, Gemini) with ChromaDB vector store, semantic chunking, embedding-based retrieval, and grounded answer generation with citations. Implemented prompt injection resistance by treating document content as data not instructions.
- Wrote unit tests, integration tests, and access control tests. Built Docker and Docker Compose configurations for one-command local setup. Set up GitHub Actions CI pipelines running lint, tests, and Docker builds on every pull request. Deployed services to production with HTTPS and health check endpoints.

Software Developer Intern

Apr 2026 – July 2026

BroaderAI (Remote)

- Built Python and JavaScript backend services with REST API endpoints, PostgreSQL integration, and Redis async coordination. Worked in feature branches with pull requests and code reviews. Delivered well-documented, tested code following SDLC practices throughout.
- Wrote unit and integration tests. Maintained structured technical documentation. Collaborated across teams using clear written and async communication. Delivered assigned work on time with a bias for shipping.

PROJECTS

Multi-Agent AI Platform | Python, FastAPI, LangGraph, ChromaDB, RAG, PostgreSQL, Docker

[GitHub](#)

- Wrote DESIGN.md before coding. Built a production-grade RAG system with FastAPI REST API, JWT authentication, ChromaDB vector store with semantic chunking and embedding retrieval, grounded answers with citations, background ingestion workers using Redis queue, structured JSON logging, Docker Compose local setup, and GitHub Actions CI. One user cannot access another user's documents. Deployed to production with HTTPS and health check endpoint.

AI-Powered Mock Interview Platform | Python, FastAPI, LLM APIs, PostgreSQL, Redis, Docker

[GitHub](#)

- Built with SDLC discipline. Designed API contracts before implementation. JWT auth with per-user data isolation. Background job processing via Redis queue. Unit and integration tests with LLM mocked in CI. Dockerised for one-command local setup. Deployed on AWS with health checks, structured logging, and rate limiting on API endpoints.

Self-Healing CI/CD Pipeline | GitHub Actions, Jenkins, Docker, Python, Trivy, Linux

[GitHub](#)

- Built CI pipeline running lint, tests, and Docker builds on every pull request. Feature branch workflow with meaningful commits and PR descriptions. Canary deployment with health-check-triggered rollback. Security scanning integrated into pipeline. Tagged release with release notes. Demonstrates SDLC, DevOps, and CI/CD discipline end to end.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash

Backend & APIs: FastAPI, Flask, REST APIs, JWT Auth

AI & RAG: LLM APIs (Claude, OpenAI, Gemini), RAG Pipelines, ChromaDB, FAISS, LangGraph

Databases: PostgreSQL, Redis, MySQL, ChromaDB

DevOps: Docker, GitHub Actions, Terraform, Linux

Testing: Manual Testing, Automation Testing, Functional, Regression, API, Integration, SDLC, STLC

Soft Skills: Analytical Thinking, Communication, Ownership, Collaboration

CERTIFICATIONS

- Claude Certified Architect – Foundations (Anthropic)
- Claude Certified Developer – Foundations (Anthropic)
- Simplilearn – CI/CD for Beginners
